Subject Index of Volumes 162–164

Abrasive particle trajectories
modeling of abrasive particle trajectories during erosion by a slurry jet, 679
Acoustic emission
sliding wear studies using acoustic emission, 597
on-line wear monitoring using acoustic emission, 605
measurements of wear and acoustic emission from fuel-wetted surfaces, 703
Active wear mechanisms
study of some active wear mechanisms in a titanium-based cermet when machining steels, 1
Ag/Mo thin film coatings
microstructures and tribological characteristics of electron-beam co-deposited Ag/Mo thin film coatings, 763
Al_2O_3
scale of microstructure effects on the impact resistance of Al_2O_3, 1073
Alloy white cast irons
repeated impact–abrasion testing of alloy white cast irons, 790
Alumina ceramics
grain size effect on abrasive wear mechanisms in alumina ceramics, 258
SEM studies of material damage in alumina ceramics by angular single and multiple particle impacts, 285
Aluminium alloy composites
tribological behaviour of aluminium alloy composites: a comparative study with a copper-based alloy, 64
Aluminium alloys
effect of external loading on wear maps of aluminium alloys, 619
Aluminum metal–matrix composites
friction behavior of ceramic fiber-reinforced aluminum metal-matrix composites against a 440C steel counterface, 47
Anti-wear adhesive coating
study of antiwear adhesive coating under different erosion conditions, 569
Austempered ductile iron
lubricated sliding and rolling wear of austempered ductile iron, 696
Austenite
influence of retained austenite on the wear resistance of high chromium cast iron under various impact loads, 83

Bearing liners
wear of bearing liners at low speed rotation of shafts with contaminated oil, 996
Bearings
study of the comet-shaped carbides in the uppermost surface layer of bearings, 466
Belt conveyor rollers
laboratory simulation of the wear process of belt conveyor rollers, 1012
Boundary film
boundary film for structural ceramic materials, 1150

CAM follower wear
quantitative analysis of cam follower wear in relation to various material properties, 897
Carbides
study of the comet-shaped carbides in the uppermost surface layer of bearings, 466
Carbon content
influence of carbon content of martensitic matrix and retained austenite on wear of martensitic ductile iron, 75
Carbon fiber–glass matrix composite
wear and friction of a unidirectional carbon fiber–glass matrix composite against various counterpart, 1103
Carbon–PEEK composites
tribological behavior of unidirectional graphite–epoxy and carbon–PEEK composites, 385
Ceramic femoral heads
an evaluation of the penetration of ceramic femoral heads into polyethylene acetabular cups, 880
Ceramics
sliding friction and wear of ceramics in neutral, acid and basic aqueous solutions, 220
role of indentation fracture in free abrasive machining of ceramics, 246
Ceramic thermal sprayed coatings
abrasion, erosion and scuffing resistance of carbide and oxide ceramic thermal sprayed coatings for different applications, 529
Ceramic tool wear
ceramic tool wear when machining austempered ductile iron, 22
Cermet
study of some active wear mechanisms in a titanium-based cermet when machining steels, 1
C^+-implanted silicon
wear resistance of C^+-implanted silicon investigated by scanning probe microscopy, 733
Composites
mechanisms of hard alloy wear in frictional processes with polymers and composite materials, 40
Copper base alloys
tribological behaviour of aluminium alloy composites: a comparative study with a copper-based alloy, 64
Cr_2O_3 coating
effects of surfactants on the tribological properties of a Cr_2O_3 coating, 229
Cu–20% Ni in situ composites
further investigation on the tribological behavior of Cu–20% Nb *in situ* composite, 211
Cutting tool materials
wear mechanisms of ultrahard, non-metallic cutting materials, 12
mapping the wear of some cutting-tool materials, 971

Damage accumulation
plastic deformation and damage accumulation below the worn surfaces, 188

Dielectric properties
role of dielectric properties in the tribological behaviour of insulators, 906
Diesel engine
tribological studies of precise friction pairs under operating conditions in a diesel engine, 1004
Diffusion treated surfaces
the wear resistance of diffusion treated surfaces, 757
Digger teeth
the characterization of white layers formed on digger teeth, 1059
Dynamically stressed material
characterization of sliding wear in dynamically stressed material, 1081

Electrical contacts
hardness, friction and wear of multiplated electrical contacts, 538
a general model for sliding wear in electrical contacts, 913
Engineering steels
study on mechanism of combined action of abrasion and cavitation erosion on some engineering steels, 811
Erodent recycling
effects of erodent recycling in solid particle erosion testing, 139
Erosion–corrosion mechanisms
review of mechanisms of erosion–corrosion of alloys at elevated temperatures, 706
Erosion damage
relationship between surface hardness and erosion damage caused by solid particle impact, 688
Erosion prediction
erosion prediction of pure metals and carbon steels, 1114
Erosive wear
erosive wear behavior of chemical vapor deposited multi-layer tungsten carbide coating, 552

Fe–Al intermetallic alloys
wear deformation of ordered Fe–Al intermetallic alloys, 432
Fe–Mo–S materials
reactions during preparation and sliding of sintered Fe–Mo–S wear-resistant materials, 450
Flooring materials
comparative wear testing of flooring materials, 990
Four-ball tester
wear as measured with a four-ball wear tester using fully flooded and vapor phase with condensation lubrication methods, 944
Free-wheel clutches
specific friction and wear mechanisms in clamping-roller free-wheel clutches, 985
Fretted couple
research on fretting wear dependence of hardness ratio and friction coefficient of fretted couple, 939
Fretting
effect of fretting on electroplated Pd–Ni contacts, 339
Fretting corrosion
surface temperatures and fretting corrosion of steel under conditions of fretting contact, 357
Fretting damage
microstructural characterization of fretting damage, 624
Fretting testing
giant-magnetostrictive vibrator system for fretting testing at low amplitudes, 1129

Galling
galling in aluminum alloys and Duralcan aluminum matrix composites, 574
Gas-blast erosion rig
influence of nozzle roughness on conditions in a gas-blast erosion rig, 148
Gas machinery
wear-resistant materials for oil and gas machinery, 957
Gas turbine bearings
sliding friction and wear up to 600 °C of high speed steels and silicon nitrides for gas turbine bearings, 890
Gears
wear of gears: a case study at Shiraz Cement Plant, 1054
Grain size
effect of grain size on friction and sliding wear of oxide ceramics, 269
Grain size effect
grain size effect on abrasive wear mechanisms in alumina ceramics, 258
Graphite–epoxy composites
tribological behavior of unidirectional graphite–epoxy and carbon–PEEK composites, 385
Grit size effect
accelerated wear testing using the grit size effect, 126
Gross slip criteria
gross slip criteria in fretting, 347

Hard coatings
comparative dry wear behavior of hard coatings, 925
Hardness
the differential effect of the hardness of metallic materials on their erosion and abrasion resistance, 773
Hertzian fracture tests
a study of the fundamental mechanisms of erosion using Hertzian fracture tests, 856
High speed contacts
the failure of poly (ether ether ketone) in high speed contacts, 407
High speed sliding
high speed sliding of Al_2O_3 pins against an En-24 steel disc, 296
Humid tropical conditions
the wear of material in humid–tropical conditions, 1066
Hydroabrasive wear processes
trends in developing theoretical and experimental investigations in studying hydroabrasive wear processes, 962
Hydrocarbon coatings
rolling-contact-fatigue wear characteristics of diamond-like hydrocarbon coatings on steels, 558
Hydroturbine runners
high silt wear of hydroturbine runners, 1040

Impact loads
influence of retained austenite on the wear resistance of high chromium cast iron under various impact loads, 83
Impact resistance
scale of microstructure effects on the impact resistance of Al_2O_3, 1073
Indentation fracture
role of indentation fracture in free abrasive machining of ceramics, 246
Insulators
role of dielectric properties in the tribological behaviour of insulators, 906

Ion implanted polymers
structure and dose effects on improved wear properties of ion-implanted polymers, 739

KCl
microscopic deformations in KCl single crystals by indentation and scratching with steel ball and pyramidal indenters, 92

Liquid crystal polymers
effect of temperature on the wear of unfilled and filled liquid crystal polymers, 656

Machinability
machinability of steels and titanium alloys under lubrication, 34
Magnesia partially stabilised zirconia
a transmission electron microscopy study of wear of magnesia partially stabilised zirconia, 322
Magnetic properties
a study on the relationship between the magnetic properties of a worn surface layer and the wear resistance, 611
Magnetization
study on reduction in wear due to magnetization, 196
440C Martensitic stainless steel
wear mechanism maps of 440C martensitic stainless steel, 614
Material damage
SEM studies of material damage in alumina ceramics by angular single and multiple particle impacts, 285
Mechanical components
wear–corrosion-resistant materials for mechanical components in harsh environments, 721
Microscopic deformations
microscopic deformations in KCl single crystals by indentation and scratching with steel ball and pyramidal indenters, 92
Microstructure effects
scale of microstructure effects on the impact resistance of Al_2O_3, 1073
Modelization of damage
modelization of damage by abrasion, 848
MoS_2 films
wear of selected materials and composites sliding against MoS_2 films, 492
MoS_2 lubrication
micromechanics of MoS_2 lubrication, 480
Mosaic blocks
study on the microstress and size of mosaic block and their relationship to the wear resistance of steels, 183
Mosaic surfaces
friction and wear behaviour of mosaic surfaces formed by laser line remelting of cast iron, 89
Movement patterns
movement patterns of abrasive particles in three-body abrasion, 782
Multilayer films
development of fracture resistant, multilayer films for precision ball bearings, 919

Ni-hard 4 cast irons
development of abrasion-resistant Ni-hard 4 cast irons, 833
Nitrogenated chromium cast irons
wear characteristics of nitrogenated chromium cast irons, 580
Nozzle roughness
influence of nozzle roughness on conditions in a gas-blast erosion rig, 148
Nylon
the transfer and wear of nylon and CuS–nylon composites: filler proportion and counterface characteristics, 397

Oil machinery
wear-resistant materials for oil and gas machinery, 957
Oxide ceramics
effect of grain size on friction and sliding wear of oxide ceramics, 269

Partially stabilized zirconia
wear behaviour of plasma-sprayed partially stabilized zirconia on a steel substrate, 636
Particle layer effects
friction microprobe investigation of particle layer effects on sliding friction, 102
Pearlitic rail steels
microstructure and wear resistance of pearlitic rail steels, 173
Photothermal radiometry
detection of wear cracks by photothermal radiometry, 590
Plastic deformation
plastic deformation and damage accumulation below the worn surfaces, 188
Plough bodies
the wear of the shares of plough bodies with rigid and elastic connections to the frame, 1002
Polyethene
tribological characteristics of filled ultrahigh molecular weight high density polyethene, 631
Polyether
tribological behavior of blends of polyether ether ketone and polyether imide, 418
Poly(ether ether ketone)
the failure of poly (ether ether ketone) in high speed contacts, 407
tribological behavior of blends of polyether ether ketone and polyether imide, 418
Polyetherpolyurethane thermoplastic elastomers
an investigation of the morphology–wear performance relationships in polyetherpolyurethane thermoplastic elastomers, 645
Polyethylene
macroscopic and microscopic wear mechanisms in ultrahigh molecular weight polyethylene, 378
effect of fillers on the friction and wear behaviour of ultrahigh molecular weight polyethylene during water-lubricated reciprocating sliding wear, 1091
Polymer-based composites
increasing wear resistance in polymer-based composites using radiation-modified polymeric additives, 426
Polymeric additives
increasing wear resistance in polymer-based composites using radiation-modified polymeric additives, 426
Polymeric coating
reciprocating sliding wear evaluation of a polymeric/coating tribological system, 748

Polymers
mechanisms of hard alloy wear in frictional processes with polymers and composite materials, 40
an analysis of the wear of polymers, 1048
Polymer surfaces
microwear processes of polymer surfaces, 370
Polyurethane
wear and friction of medical grade polyurethane sliding on smooth metal counterfaces, 627
Powder lubrication
wear reduction systems for coal-fueled diesel engines. I. The basics of powder lubrication, 508
wear reduction systems for coal-fueled diesel engines. II. Experimental results and hydrodynamic model of powder lubrication, 518
PVD-coated indexable inserts
comparison of abrasion model test results and machining tests with PVD-coated indexable inserts, 1033

Rail steels
rolling–sliding behavior of rail steels, 159
Repetitive impact wear
repetitive impact wear of steels, 837
Rubber composites
friction and wear of short-fibre-reinforced rubber composites under various sliding speeds and loads, 930

Scanning Auger spectrometer
In situ wear experiments in the scanning Auger spectrometer, 132
Scratching
material response to two-dimensional scratching by wedges, 110
Scratch test
wear and scratch hardness of 304 stainless steel investigated with a single scratch test, 713
Scratch tests
scratch tests on iron-, nickel- and cobalt-based alloys at elevated temperatures, 585
Self-lubricating composites
friction and wear of self-lubricating composites at temperatures to 450 °C in vacuum, 471
Self-welding
experimental study of self-welding of materials in high temperature liquid sodium, 458
Semiconductor silicon
ball-on-flat reciprocating sliding wear of single-crystal, semiconductor silicon at room temperature, 332
Si_3N_4
solid-particle erosion of *in situ* reinforced Si_3N_4, 280
Silicon nitride
the combined effect of speed and humidity on the wear and friction of silicon nitride, 234
Sintered materials
a study of friction and wear characteristics of copper- and iron-based sintered materials, 1123
Sliding velocity
effect of sliding velocity on the wear-effect of time–temperature equivalence, 662
Sliding wear
a general model for sliding wear in electrical contacts, 913
Slurry environments
the performance of aluminium alloys and particulate reinforced aluminium metal matrix composites in erosive–corrosive slurry environments, 57
Slurry jet
modeling of abrasive particle trajectories during erosion by a slurry jet, 679
Slurry pot erosion tester
specimen diameter, impact velocity, erosion rate and particle density in a slurry pot erosion tester, 669
Slurry pump
effect of operating conditions on the wear of wet parts in slurry pumps, 1016
Smooth, hard solids
frictional behavior of extremely smooth and hard solids, 873
Solid-particle erosion
solid-particle erosion of *in situ* reinforced Si_3N_4, 280
Stability
tribological stability of metallic materials at elevated temperatures, 441
304 Stainless steel
wear and scratch hardness of 304 stainless steel investigated with a single scratch test, 713
corrosion–wear study of 304 stainless steel in various NaCl solutions, 950
Stick–slip
fundamentals of stick–slip, 1139
Structural ceramics
boundary film for structural ceramic materials, 1150
Surface hardness
relationship between surface hardness and erosion damage caused by solid particle impact, 688
Surfactants
effects of surfactants on the tribological properties of a Cr_2O_3 coating, 229

Thermoplastic bearing materials
selected thermoplastic bearing materials for use at elevated temperatures, 649
Three-body abrasion
a model for three-body abrasion of brittle materials, 954
Three-body abrasive wear
three-body abrasive wear of 0.98% carbon steel, 802
Ti_6Al_4V/PCTFE
type of wear for the pair Ti6Al4V/PCTFE in ambient air and in liquid nitrogen, 1025
TiN-coated bushings
application of TiN-coated bushings in the standard method for indicating the wear characteristics of hydraulic fluids in vane pumps, 966
Titanium coating combinations
wear behavior of titanium–coating combinations at elevated temperatures, 1045
Titanium–nickel alloy
tribological behavior of a titanium–nickel alloy, 202
Tribochemical mechanisms Si_3N_4
tribochemical mechanisms of Si_3N_4 with additives, 1068
Tribometer
a SEM/AES/XPS tribometer for rolling and sliding contacts, 593
Tribosurfaces
wear reduction by pyrolytic carbon on tribosurfaces, 498
Tungsten carbide coating
erosive wear behavior of chemical vapor deposited multilayer tungsten carbide coating, 552

Unlubricated sliding
wear mechanisms of silicon nitride, partially stabilized zirconia and alumina in unlubricated sliding against steel, 305

Vane pumps
application of TiN-coated bushings in the standard method for indicating the wear characteristics of hydraulic fluids in vane pumps, 966
Vertical shaft impact breaker
operational wear in the impeller of a vertical shaft impact breaker, 1022
Vibrator system
giant-magnetostrictive vibrator system for fretting testing at low amplitudes, 1129

Water slurries
wear testing in water slurries, 1029
Wear behavior of ceramics
characterization of wear behavior of steel and ceramics in the VAMAS round robin tests, 119
Wear behavior of steel
characterization of wear behavior of steel and ceramics in the VAMAS round robin tests, 119
Wear cracks
detection of wear cracks by photothermal radiometry, 590
Wear reduction
study on reduction in wear due to magnetization, 196
Wear resistance
a study on the relationship between the magnetic properties of a worn surface layer and the wear resistance, 611
Wheel/rail systems
slip–time history influences on the interaction between friction and wear in contaminated rolling contacts of wheel–rail systems, 980
Wheel flange wear
investigation of wheel flange wear on the Santander FEVE rail – a case study, 975
White cast irons
abrasive wear study of selected white cast irons as liner materials for the mining industry, 820
Worn surfaces
the generation of worn surfaces by the repeated interaction of parallel grooves, 864

Zirconia toughened alumina
effect of microstructure on the wear transition of zirconia-toughened alumina, 314
